Dang! I've had a couple of those this year – not fun.

Ok, well that looks like it will be a chill trip then (fingers crossed).

Yeah, Bill Schroeder and I did a bunch of work on it before superfund took it over. I'm on standby to go down, but I guess they sent a bunch of OSCs down there, so I probably won't go. Have fun with the analysis part.

It was probably a nice thing to have your phone die for a little bit ☺

Talk to you later,

That's correct. Sounds like the crew had a trip from hell last week but they still managed to sample 10 lakes. Boat died, sampler broke, trailer tire went flat, hotel didn't have reservations... awful week.

The only lake they dropped from sampling was N. Michigan but it's so far out of the way, I don't think you should grab it. We'll be fine without it. I packed lots of extra bottles just in case the crew had to drop more lakes last week but you shouldn't need them.

So you're not side tracked with Gold Kind mine stuff?? I'm glad you weren't the one doing the field work out there. Gold King has become a priority here so we need to start analyzing data ASAP. Fun fun.

My phone has been dead but I think it's fixed now. Feel free to call if you want to chat.

Hi Sarah,

Thanks for the information.

I received all of the coolers.

It looks like the lakes you have us sampling:

Harvey Gap

Rifle Gap

Ruedi

Vega

Highline

Is that correct and are there any other ones?

Thanks,

Jeff McPherson

Hi Jeff,

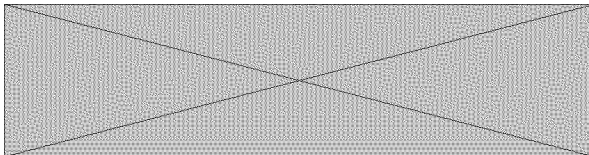

Here is the email address for Jacqueline Knutson, our summer intern who dropped off coolers at your lab today. Jacqueline lives in Golden and can probably help with transporting samples to our lab after your lake trips if that helps.

Hope the Wyoming lakes trip went well!

Sarah
